EIZO's Approach to CSR

Our business activity in itself constitutes our most important social responsibility. We are aware that our social responsibility lies in engaging in business with integrity, which includes contributing to society with products, solutions and services, returning all the benefits produced through our business to society, and complying with laws and regulations while respecting human rights. In addition, with the view that participating in and supporting regional activities constitute part of our social responsibility, we enthusiastically engage in such activities. In this context and as the basic policy underlying our CSR, we uphold the EIZO Group Principles of Conduct, which serve as both a guideline for the EIZO Group and our promise to stakeholders.

Sustainable Development Goals (SDGs)

EIZO will identify the areas where it can contribute to achieving the SDGs adopted in 2015 by the United Nations and will present its related efforts in the CSR Report.
