

EIZO Earns EPEAT Silver Certification for Reducing Environmental Impact

Hakusan, Japan, April 10, 2020 – EIZO Corporation (TSE: 6737) today announced that four of its FlexScan EV series monitors earned EPEAT Silver certification for reducing environmental impact.

EPEAT (Electronic Product Environmental Assessment Tool) is an electronic product environmental assessment system which was established in the USA in 2006. Today, government facilities and thousands of private and public institutions refer to EPEAT for sustainable procurement. The EPEAT criteria were updated in 2018 to include stricter guidelines and add criteria concerning energy management, occupational health, and safety development throughout the entire supply chain. Products are ranked as EPEAT Gold, Silver, or Bronze depending on the extent to which they meet the criteria.

The EIZO Group has endorsed and worked towards the EPEAT goals it since its implementation and the FlexScan EV series of monitors were among the first products to meet the Bronze rank in accordance with the 2018 updated policies. Now, four models have earned EPEAT Silver certification as testament to EIZO's goals to lower environmental impact of its products and continue CSR activities.

EIZO's corporate philosophy is "Through the pursuit of imaging solutions with advanced technologies, we enrich people in their professional and personal lives." In pursuit of this, EIZO aims to meet the higher standards set forth by EPEAT Gold to further reduce environmental impact of its products and business practices.
