INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of EIZO Corporation:

We have audited the accompanying consolidated balance sheet of EIZO Corporation (formerly, EIZO NANAO CORPORATION) and its subsidiaries as of March 31, 2013, and the related consolidated statements of income, comprehensive income, changes in equity, and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information, all expressed in Japanese yen.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in Japan, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of EIZO Corporation and its subsidiaries as of March 31, 2013, and the consolidated results of their operations and their cash flows for the year then ended in accordance with accounting principles generally accepted in Japan.

Convenience Translation

Our audit also comprehended the translation of Japanese yen amounts into U.S. dollar amounts and, in our opinion, such translation has been made in accordance with the basis stated in Note 1 to the consolidated financial statements. Such U.S. dollar amounts are presented solely for the convenience of readers outside Japan.

Notes to Consolidated Financial Statements Year Ended March 31, 2013

1. BASIS OF PRESENTATION OF CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements have been prepared in accordance with the provisions set forth in the Japanese Financial Instruments and Exchange Act and its related accounting regulations and in accordance with accounting principles generally accepted in Japan ("Japanese GAAP"), which are different in certain respects as to the application and disclosure requirements of International Financial Reporting Standards.

In preparing these consolidated financial statements, certain reclassifications and rearrangements have been made to the consolidated financial statements issued domestically in order to present them in a form that is more familiar to readers outside Japan. In addition, certain reclassifications have been made in the 2012 consolidated financial statements to conform to the classifications used in 2013.

The consolidated financial statements are stated in Japanese yen, the currency of the country in which EIZO Corporation (the "Company") is incorporated and operates. The translations of Japanese yen amounts into U.S. dollar amounts are included solely for the convenience of readers outside Japan and have been made at the rate of ¥94 to \$1, the approximate rate of exchange at March 31, 2013. Such translations should not be construed as representations that the Japanese yen amounts could be converted into U.S. dollars at that or any other rate.

The Company has changed its corporate name from EIZO NANAO CORPORATION to EIZO Corporation on April 1, 2013.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Consolidation—The consolidated financial statements as of March 31, 2013, include the accounts of the Company and its 15 (14 in 2012) subsidiaries (together, the "Group").

Under the control concept, those companies in which the Company, directly or indirectly, is able to exercise control over operations are fully consolidated.

All significant intercompany balances and transactions have been eliminated in consolidation. All material unrealized profit included in assets resulting from transactions within the Group is also eliminated.

During the year ended March 31, 2013, EIZO Austria GmbH has been included in consolidation as a result of its establishment.

b. Unification of Accounting Policies Applied to Foreign Subsidiaries for the Consolidated Financial Statements—In May 2006, the Accounting Standards Board of Japan (the "ASBJ") issued ASBJ Practical Issues Task Force ("PITF") No. 18, "Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for the Consolidated Financial Statements." PITF No. 18 prescribes that the accounting policies and procedures applied to a parent company and its subsidiaries for similar transactions and events under similar circumstances should in principle be unified for the preparation of the consolidated financial statements. However, financial

statements prepared by foreign subsidiaries in accordance with either International Financial Reporting Standards or generally accepted accounting principles in the United States of America tentatively may be used for the consolidation process, except for the following items should be adjusted in the consolidation process so that net income is accounted for in accordance with Japanese GAAP, unless they are not material: (a) amortization of goodwill; (b) scheduled amortization of actuarial gain or loss of pensions that has been directly recorded in equity; (c) expensing capitalized development costs of research and development ("R&D"); (d) cancellation of the fair value model of accounting for property, plant, and equipment and investment properties and incorporation of the cost model of accounting; and (e) exclusion of minority interests from net income, if included.

c. Business Combination—In October 2003, the Business Accounting Council issued a Statement of Opinion, "Accounting for Business Combinations," and in December 2005, the ASBJ issued ASBJ Statement No. 7, "Accounting Standard for Business Divestitures," and ASBJ Guidance No. 10, "Guidance for Accounting Standard for Business Combinations and Business Divestitures."

The accounting standard for business combinations allowed companies to apply the pooling-of-interests method of accounting only when certain specific criteria are met such that the business combination is essentially regarded as a uniting-of-interests. For business combinations that do not meet the uniting-of-interests criteria, the business combination is considered to be an acquisition and the purchase method of accounting is required. This standard also prescribes the accounting for combinations of entities under common control and for joint ventures.

In December 2008, the ASBJ issued a revised accounting standard for business combinations, ASBJ Statement No. 21, "Accounting Standard for Business Combinations." Major accounting changes under the revised accounting standard are as follows: (1) The revised standard requires accounting for business combinations only by the purchase method. As a result, the pooling-of-interests method of accounting is no longer allowed. (2) The previous accounting standard required R&D costs to be charged to income as incurred. Under the revised standard, in-process R&D (IPR&D) costs acquired in a business combination are capitalized as an intangible asset. (3) The previous accounting standard provided for a bargain purchase gain (negative goodwill) to be systematically amortized over a period not exceeding 20 years. Under the revised standard, the acquirer recognizes the bargain purchase gain in profit or loss immediately on the acquisition date after reassessing and confirming that all of the assets acquired and all of the liabilities assumed have been identified after a review of the procedures used in the purchase price allocation. The revised standard was applicable to business combinations undertaken on or after April 1, 2010.

d. Cash Equivalents—Cash equivalents are short-term investments that are readily convertible into cash and that are exposed to insignificant risk of changes in value.

Cash equivalents include time deposits, certificates of deposit, and commercial paper, all of which mature or become due within three months of the date of acquisition.

- **e. Inventories**—Inventories are stated at the lower of cost, determined by the average method for finished products and work in progress and by the moving-average method for raw materials, or net selling value.
- f. Investment Securities—Available-for-sale securities, which represent securities not classified as either trading securities or held-to-maturity debt securities, are reported at fair value, with unrealized gains and losses, net of applicable taxes, reported as a separate component of equity. The cost of available-for-sale securities sold is determined based on the moving-average method.

Nonmarketable available-for-sale securities are stated at cost determined by the moving-average method.

For other-than-temporary declines in fair value, investment securities are reduced to net realizable value by a charge to income.

- g. Property, Plant, and Equipment—Property, plant, and equipment are stated at cost. Depreciation of property, plant, and equipment of the Company and its domestic subsidiaries is computed substantially by the declining-balance method at rates based on the estimated useful lives of the assets, while the straight-line method is applied to buildings of the Company and its domestic subsidiaries acquired after April 1, 1998, and all property, plant, and equipment of foreign subsidiaries. The range of useful lives is principally from 15 to 50 years for buildings and structures, from 7 to 10 years for machinery and equipment, and from 2 to 6 years for furniture and fixtures.
- h. Goodwill—Goodwill is amortized over 10 years by the straight-line method. Immaterial goodwill may be charged entirely to income at acquisition. Amortization of goodwill is ¥165 million (\$1,755 thousand) and ¥169 million for the years ended March 31, 2013 and 2012, respectively.
- i. Long-Lived Assets—The Group reviews its long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset or asset group may not be recoverable. An impairment loss is recognized if the carrying amount of an asset or asset group exceeds the sum of the undiscounted future cash flows expected to result from the continued use and eventual disposition of the asset or asset group. The impairment loss would be measured as the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of the discounted cash flows from the continued use and eventual disposition of the asset or the net selling price at disposition.
- j. Retirement and Pension Plans—The Company and certain of its domestic subsidiaries have a defined contribution pension plan and unfunded retirement benefit plans. Other domestic subsidiaries have a defined benefit pension plan and unfunded retirement benefit plans. Certain foreign subsidiaries have either a defined contribution plan or defined benefit plan. Additionally, the Company or its subsidiaries may add premium severance pay.

The Group accounted for the liability for retirement benefits based on the projected benefit obligations and plan assets at the consolidated balance sheet date.

Retirement benefits to directors and Audit & Supervisory Board members are recorded at the amount that would be required if all directors and Audit & Supervisory Board members retired at the consolidated balance sheet date. In June 2004, the retirement benefit system was abolished and the amount required to be paid at the time of the abolishment will be paid to directors and Audit & Supervisory Board members upon their retirement.

k. Asset Retirement Obligations—In March 2008, the ASBJ published ASBJ Statement No. 18, "Accounting Standard for Asset Retirement Obligations," and ASBJ Guidance No. 21, "Guidance on Accounting Standard for Asset Retirement Obligations." Under this accounting standard, an asset retirement obligation is defined as a legal obligation imposed either by law or contract that results from the acquisition, construction, development, and normal operation of a tangible fixed asset and is associated with the retirement of such tangible fixed asset. The asset retirement obligation is recognized as the sum of the discounted cash flows required for the future asset retirement and is recorded in the period in which the obligation is incurred if a reasonable estimate can be made. If a reasonable estimate of the asset retirement obligation cannot be made in the period the asset retirement obligation is incurred, the liability should be

recognized when a reasonable estimate of the asset retirement obligation can be made. Upon initial recognition of a liability for an asset retirement obligation, an asset retirement cost is capitalized by increasing the carrying amount of the related fixed asset by the amount of the liability. The asset retirement cost is subsequently allocated to expense through depreciation over the remaining useful life of the asset. Over time, the liability is accreted to its present value each period. Any subsequent revisions to the timing or the amount of the original estimate of undiscounted cash flows are reflected as an adjustment to the carrying amount of the liability and the capitalized amount of the related asset retirement cost.

- *l. R&D Costs*—R&D costs are charged to income as incurred.
- **m.** Leases—In March 2007, the ASBJ issued ASBJ Statement No. 13, "Accounting Standard for Lease Transactions," which revised the previous accounting standard for lease transactions. The revised accounting standard for lease transactions was effective for fiscal years beginning on or after April 1, 2008.

Under the previous accounting standard, finance leases that were deemed to transfer ownership of the leased property to the lessee were to be capitalized. However, other finance leases were permitted to be accounted for as operating lease transactions if certain "as if capitalized" information was disclosed in the notes to the lessee's financial statements. The revised accounting standard requires that all finance lease transactions should be capitalized to recognize lease assets and lease obligations in the consolidated balance sheet. In addition, the revised accounting standard permits leases that existed at the transition date and that did not transfer ownership of the leased property to the lessee to be accounted for as operating lease transactions.

The Company applied the revised accounting standard effective April 1, 2008. In addition, the Company accounted for leases that existed at the transition date and that did not transfer ownership of the leased property to the lessee as operating lease transactions.

All other leases are accounted for as operating leases.

n. Software Development Contracts—In December 2007, the ASBJ issued ASBJ Statement No. 15, "Accounting Standard for Construction Contracts," and ASBJ Guidance No. 18, "Guidance on Accounting Standard for Construction Contracts."

Under this accounting standards, revenue from sales of the customized software and costs of development of the customized software should be recognized by the percentage-of-completion method if the outcome of a development contract can be estimated reliably. When total revenue, total costs, and the stage of completion of the contract at the consolidated balance sheet date can be reliably measured, the outcome of a development contract can be estimated reliably. If the outcome of a development contract cannot be reliably estimated, the completed contract method should be applied. When it is probable that the total costs will exceed total revenue, an estimated loss on the contract should be immediately recognized by providing for a loss on development contracts.

o. Income Taxes—The provision for income taxes is computed based on the pretax income included in the consolidated statement of income. The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Deferred taxes are measured by applying currently enacted tax laws to the temporary differences.

The Group files a tax return under the consolidated corporate tax system in Japan, which allows companies to base tax payments on the combined profits or losses of the parent company and its wholly owned domestic subsidiaries.

- p. Foreign Currency Transactions—All short-term and long-term monetary receivables and payables denominated in foreign currencies are translated into Japanese yen at the exchange rates at the consolidated balance sheet date. The foreign exchange gains and losses from translation are recognized in the consolidated statement of income to the extent that they are not hedged by forward exchange contracts.
- **q.** Foreign Currency Financial Statements—The balance sheet accounts of the foreign subsidiaries are translated into Japanese yen at the current exchange rate as of the balance sheet date, except for equity, which is translated at the historical rate.

Differences arising from such translation were shown as "Foreign currency translation adjustments" under accumulated other comprehensive income as a separate component of equity.

Revenue and expense accounts of foreign subsidiaries are translated into Japanese yen at the average exchange rate.

r. Derivatives and Hedging Activities—The Group uses derivative financial instruments to manage its exposures to fluctuations in foreign exchange. Foreign exchange forward contracts are utilized by the Group to reduce foreign currency exchange risks. The Group does not enter into derivatives for trading or speculative purposes.

Derivative financial instruments are classified and accounted for as follows: (1) all derivatives are recognized as either assets or liabilities and measured at fair value with gains or losses on derivative transactions recognized in the consolidated statement of income and (2) for derivatives used for hedging purposes, if the derivatives qualify for hedge accounting because of high correlation and effectiveness between the hedging instruments and the hedged items, the gains or losses on derivatives are deferred until maturity of the hedged transactions.

Foreign currency forward contracts applied for forecasted transactions are measured at the fair value, but the unrealized gains or losses are deferred until the underlying transactions are completed.

s. Per Share Information—Basic net income per share is computed by dividing net income available to common shareholders by the weighted-average number of common shares outstanding for the period.

Cash dividends per share shown in the consolidated statement of income are presented on an accrual basis, and include interim dividends paid and year-end dividends to be approved after the consolidated balance sheet date.

Diluted net income per share of common stock is not disclosed herein because the Company has not issued any securities that are potentially dilutive for the years ended March 31, 2013 and 2012.

t. Accounting Changes and Error Corrections—In December 2009, the ASBJ issued ASBJ Statement No. 24, "Accounting Standard for Accounting Changes and Error Corrections," and ASBJ Guidance No. 24, "Guidance on Accounting Standard for Accounting Changes and Error Corrections." Accounting treatments under this standard and guidance are as follows:
(1) Changes in Accounting Policies—When a new accounting policy is applied following revision of an accounting standard, the new policy is applied retrospectively, unless the revised accounting standard includes specific transitional provisions, in which case the entity shall comply with the specific transitional provisions. (2) Changes in Presentation—When the presentation of consolidated financial statements is changed, prior-period consolidated financial statements are reclassified in accordance with the new presentation. (3) Changes in Accounting Estimates—A change in an accounting estimate is accounted for in the period of the change if the change affects that period only, and is accounted for prospectively if the change affects both the period of the change and future periods. (4) Corrections of Prior-Period Errors—When an error in prior-period consolidated financial statements is discovered, those consolidated financial statements are restated.

u. New Accounting Pronouncements

Accounting Standard for Retirement Benefits—On May 17, 2012, the ASBJ issued ASBJ Statement No. 26, "Accounting Standard for Retirement Benefits" and ASBJ Guidance No. 25, "Guidance on Accounting Standard for Retirement Benefits," which replaced the Accounting Standard for Retirement Benefits that had been issued by the Business Accounting Council in 1998 with an effective date of April 1, 2000, and the other related practical guidance, and followed by partial amendments from time to time through 2009.

Major changes are as follows:

(a) Treatment in the consolidated balance sheet

Under the current requirements, actuarial gains and losses and past service costs that are yet to be recognized in profit or loss are not recognized in the consolidated balance sheet, and the difference between retirement benefit obligations and plan assets (hereinafter, "deficit or surplus"), adjusted by such unrecognized amounts, is recognized as a liability or asset.

Under the revised accounting standard, actuarial gains and losses and past service costs that are yet to be recognized in profit or loss shall be recognized within equity (accumulated other comprehensive income), after adjusting for tax effects, and any resulting deficit or surplus shall be recognized as a liability (liability for retirement benefits) or asset (asset for retirement benefits).

(b) Treatment in the consolidated statement of income and the consolidated statement of comprehensive income

The revised accounting standard does not change how to recognize actuarial gains and losses and past service costs in profit or loss. Those amounts would be recognized in profit or loss over a certain period no longer than the expected average remaining working lives of the employees. However, actuarial gains and losses and past service costs that arose in the current period and have not yet been recognized in profit or loss shall be included in other comprehensive income and actuarial gains and losses and past service costs that were recognized in other comprehensive income in prior periods and then recognized in profit or loss in the current period shall be treated as reclassification adjustments.

(c) Amendments relating to the method of attributing expected benefit to periods and relating to the discount rate and expected future salary increases

The revised accounting standard also made certain amendments relating to the method of attributing expected benefit to periods and relating to the discount rate and expected future salary increases.

This accounting standard and the guidance for (a) and (b) above are effective for the end of annual periods beginning on or after April 1, 2013, and for (c) above are effective for the beginning of annual periods beginning on or after April 1, 2014, or for the beginning of annual periods beginning on or after April 1, 2015, subject to certain disclosure in March 2015, both with earlier application being permitted from the beginning of annual periods beginning on or after April 1, 2013. However, no retrospective application of this accounting standard to consolidated financial statements in prior periods is required.

The Company expects to apply the revised accounting standard for (a) and (b) above from the end of the annual period beginning on April 1, 2013, and for (c) above from the beginning of the annual period beginning on April 1, 2014, and is in the process of measuring the effects of applying the revised accounting standard in future applicable periods.

3. CHANGES IN PRESENTATION

Prior to April 1, 2012, "Foreign exchange (gain) loss—net" was included in the other—net among the operating activities section of the consolidated statement of cash flows. Since the account became significant during this fiscal year ended March 31, 2013, such amount is disclosed separately in the operating activities section of the consolidated statement of cash flows for the year ended March 31, 2013. The amount included in the other—net for the year ended March 31, 2012, was ¥165 million.

Prior to April 1, 2012, "Purchases of software and other long-lived assets" was included in "Decrease (increase) in other assets" among the investment activities section of the consolidated statement of cash flows. Since the account became significant during this fiscal year ended March 31, 2013, such amount is disclosed separately in the investment activities section of the consolidated statement of cash flows for the year ended March 31, 2013. The amount included in "Decrease (increase) in other assets" for the year ended March 31, 2012, was ¥679 million.

4. INVESTMENT SECURITIES

Investment securities as of March 31, 2013 and 2012, consisted of the following:

	Millions of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Investment securities:			
Marketable equity securities	¥14,692	¥10,722	\$156,298
Nonmarketable equity securities	16	16	170
Debt securities	304		3,234
Others	33	40	351
Total	¥15,045	¥10,778	\$160,053

The cost and aggregate fair value of the securities classified as available for sale at March 31, 2013 and 2012, were as follows:

Millions of Yen				
		Unrealized	Unrealized	Fair
March 31, 2013	Cost	Gains	Losses	<u>Value</u>
Securities classified as available for sale:				
Equity securities	¥4,954	¥9,884	¥146	¥14,692
Debt securities	300	4		304
Others	33			33
Total	¥5,287	¥9,888	¥146	¥15,029
March 31, 2012				
Securities classified as available for sale:				
Equity securities	¥4,680	¥6,509	¥467	¥10,722
Others	41		1	40
Total	¥4,721	¥6,509	¥468	¥10,762
		Thousands o	f U.S. Dollars	
		Unrealized	Unrealized	Fair
March 31, 2013	Cost	Gains	Losses	<u>Value</u>
Securities classified as available for sale:				
Equity securities	\$52,702	\$105,149	\$1,553	\$156,298
Debt securities	3,191	43		3,234
Others	348	3		351
Total	\$56,241	\$105,195	\$1,553	\$159,883

The proceeds from sales of available-for-sale securities for the year ended March 31, 2012, were ¥113 million. The gross realized gains and losses on these sales, computed on the moving-average cost basis, for the year ended March 31, 2012, were ¥8 million and ¥395 million, respectively.

The impairment loss on available-for-sale equity securities for the years ended March 31, 2013 and 2012, was ¥27 million (\$287 thousand) and ¥403 million, respectively.

5. INVENTORIES

Inventories at March 31, 2013 and 2012, consisted of the following:

	Million	Thousands of U.S. Dollars	
	2013	2012	2013
Finished products Work in process	¥ 6,592 4,628	¥ 4,982 5,043	\$ 70,128 49,234
Raw materials and supplies	9,536	7,882	101,447
Total	¥20,756	¥17,907	\$220,809

6. LONG-LIVED ASSETS

The total loss on impairment of long-lived assets at March 31, 2013, amounted to ¥181 million (\$1,926 thousand), which was a write-down of buildings and land. The Group decided to sell these assets in the future, and thus the recoverable amount was measured at its net selling value.

7. RETIREMENT AND PENSION PLANS

The Company and its certain subsidiaries have severance payment plans for employees, directors, and Audit & Supervisory Board members.

Under most circumstances, employees terminating their employment are entitled to retirement benefits determined based on the rate of pay at the time of termination, years of service, and certain other factors. Such retirement benefits are given in the form of a lump-sum severance payment from the Company or from certain subsidiaries and annuity payments from the Company, certain subsidiaries, or a trustee. Employees of the Company or certain subsidiaries are entitled to larger payments if the termination is involuntary, by retirement at the mandatory retirement age, by death, or by voluntary retirement at certain specific ages prior to the mandatory retirement age.

The liability for employees' retirement benefits at March 31, 2013 and 2012, consisted of the following:

	Million	Millions of Yen		
	<u>2013</u>	2012	<u>U.S. Dollars</u> <u>2013</u>	
Projected benefit obligation Fair value of plan assets Unrecognized actuarial loss	¥3,310 (886) (265)	¥3,388 (1,044) (155)	\$35,213 (9,426) (2,819)	
Net liability	¥2,159	¥2,189	\$22,968	

The components of net periodic benefit costs for the years ended March 31, 2013 and 2012, are as follows:

	Million	Thousands of U.S. Dollars	
	2013	2012	2013
Service cost	¥332	¥378	\$3,532
Interest cost	37	65	394
Expected return on plan assets		(13)	(1)
Recognized actuarial loss (gain)	21	<u>(8</u>)	223
Net periodic benefit costs	¥390	¥422	\$4,148

Assumptions used for the years ended March 31, 2013 and 2012, are as follows:

	<u>2013</u>	2012
Discount rate	0.5%-3.5%	1.0%-5.3%
Expected rate of return on plan assets	0.0%	0.5% - 2.5%
Recognition period of actuarial gain/loss	5 years	5 years

The liability for retirement benefits at March 31, 2013 and 2012, for directors and Audit & Supervisory Board members was ¥102 million (\$1,085 thousand) and ¥106 million, respectively.

8. EQUITY

Japanese companies are subject to the Companies Act of Japan (the "Companies Act"). The significant provisions in the Companies Act that affect financial and accounting matters are summarized below:

a. Dividends

Under the Companies Act, companies can pay dividends at any time during the fiscal year in addition to the year-end dividend upon resolution at the shareholders' meeting. For companies that meet certain criteria, such as (1) having a board of directors, (2) having independent auditors, (3) having an Audit & Supervisory Board, and (4) the term of service of the directors is prescribed as one year rather than two years of normal term by its articles of incorporation, the board of directors may declare dividends (except for dividends in kind) at any time during the fiscal year if the company has prescribed so in its articles of incorporation. The Company meets all of the above criteria.

The Companies Act permits companies to distribute dividends in kind (noncash assets) to shareholders subject to certain limitations and additional requirements.

Semiannual interim dividends may also be paid once a year upon resolution by the board of directors if the articles of incorporation of the company so stipulate. The Companies Act provides certain limitations on the amounts available for dividends or the purchase of treasury stock. The limitation is defined as the amount available for distribution to the shareholders, but the amount of net assets after dividends must be maintained at no less than ¥3 million.

b. Increases/Decreases and Transfer of Common Stock, Reserve, and Surplus

The Companies Act requires that an amount equal to 10% of dividends must be appropriated as a legal reserve (a component of retained earnings) or as additional paid-in capital (a component of capital surplus), depending on the equity account charged upon the payment of such dividends, until the total of the aggregate amount of the legal reserve and additional paid-in capital equals 25% of the amount of common stock. Under the Companies Act, the total amount of additional paid-in capital and legal reserve may be reversed without limitation. The Companies Act also provides that common stock, legal reserve, additional paid-in capital, other capital surplus, and retained earnings can be transferred among the accounts under certain conditions upon resolution of the shareholders.

c. Treasury Stock and Treasury Stock Acquisition Rights

The Companies Act also provides for companies to purchase treasury stock and dispose of such treasury stock by resolution of the board of directors. The amount of treasury stock purchased cannot exceed the amount available for distribution to the shareholders which is determined by specific formula.

Under the Companies Act, stock acquisition rights are presented as a separate component of equity.

The Companies Act also provides that companies can purchase both treasury stock acquisition rights and treasury stock. Such treasury stock acquisition rights are presented as a separate component of equity or deducted directly from stock acquisition rights.

9. INCOME TAXES

The Company and its domestic subsidiaries are subject to Japanese national and local income taxes that, in the aggregate, resulted in normal effective statutory tax rates of approximately 37.8% and 40.4% for the years ended March 31, 2013 and 2012, respectively.

The tax effects of significant temporary differences and tax loss carryforwards that resulted in deferred tax assets and liabilities at March 31, 2013 and 2012, are as follows:

	3 (11)		Thousands of
	Millions	U.S. Dollars	
	<u>2013</u>	<u>2012</u>	2013
Deferred tax assets:			
Inventories	¥ 909	¥ 820	\$ 9,670
Pension and severance costs	723	741	7,691
Tax loss carryforwards	1,906	1,348	20,277
Accrued expenses	723	994	7,691
Other	1,816	1,975	19,320
Less valuation allowance	(2,866)	(2,446)	(30,489)
Total	3,211	3,432	34,160
Deferred tax liabilities:			
Unrealized gain on available-for-sale securities	(3,379)	(2,158)	(35,947)
Other	(46)	(47)	(489)
Total	(3,425)	(2,205)	(36,436)
Net deferred tax assets	¥ (214)	¥1,227	<u>\$ (2,276)</u>

Deferred tax assets and liabilities were included in the consolidated balance sheet as follows:

	Million: 2013	s of Yen 2012	Thousands of U.S. Dollars 2013
Current assets—Deferred tax assets Investments and other assets—Deferred tax assets Current liabilities—Other current liabilities Long-term liabilities—Deferred tax liabilities	¥1,775 297 (27) (2,259)	¥2,077 319 (33) (1,136)	\$18,883 3,160 (287) (24,032)
Net deferred tax assets	¥ (214)	¥1,227	\$ (2,276)

A reconciliation between the normal effective statutory tax rates and the actual effective tax rates reflected in the accompanying consolidated statement of income for the year ended March 31, 2013, with the corresponding figures for and 2012 is as follows:

	<u>2013</u>	2012
Normal effective statutory tax rate	37.8%	40.4%
Tax credit for research expenses	(4.1)	(6.1)
Increase in valuation allowance	14.4	9.4
Effect of tax rate reduction		8.1
Other—net	(3.3)	3.9
Actual effective tax rate	44.8%	55.7%

On December 2, 2011, new tax reform laws were enacted in Japan, which changed the normal effective statutory tax rate from approximately 40.4% to 37.8%, effective for the fiscal years beginning on or after April 1, 2012 through March 31, 2015, and to 35.4% afterwards.

At March 31, 2013, certain subsidiaries have tax loss carryforwards aggregating approximately ¥7,267 million (\$77,307 thousand) that are available to be offset against taxable income of such subsidiaries in future years. These tax loss carryforwards, if not utilized, will expire as follows:

Year Ending March 31	Millions of Yen	Thousands of U.S. Dollars		
2015	¥ 54	\$ 574		
2016	107	1,138		
2017	96	1,021		
2018	21	223		
2019 and thereafter	_6,989	74,351		
Total	¥7,267	\$77,307		

10. R&D COSTS

R&D costs charged to income were \(\frac{\pmathbf{\frac{4}}}{5,323}\) million (\\$56,628\) thousand) and \(\frac{\pmathbf{\frac{4}}}{5,311}\) million for the years ended March 31, 2013 and 2012, respectively.

11. LEASES

The minimum rental commitments under noncancelable operating leases at March 31, 2013 and 2012, were as follows:

	Million	Millions of Yen	
	2013	2012	2013
Due within one year Due after one year	¥239 _644	¥ 94 _142	\$2,543 _6,851
Total	¥883	¥236	\$9,394

12. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES

(1) Group Policy for Financial Instruments

The Group uses financial instruments based on its capital expenditure plan. Cash surpluses, if any, are invested in low-risk financial assets. Derivatives are used, not for speculative purposes, but to manage exposure to financial risks as described in (2) below.

(2) Nature and Extent of Risks Arising from Financial Instruments

Receivables such as trade notes and trade accounts, are exposed to customer credit risk. Although receivables in foreign currencies are exposed to the risk of fluctuation in foreign currency exchange rates, the position, net of payables in foreign currencies, is hedged by using forward foreign currency contracts. Marketable and investment securities, mainly debt securities and equity instruments of customers and suppliers of the Group, are exposed to the risk of market price fluctuations.

All payment terms of payables, such as trade accounts, are due within one year. Although payables in foreign currencies are exposed to the risk of fluctuation in foreign currency exchange rates, those risks are netted against the balance of receivables denominated in the same foreign currency, as noted above.

Derivatives mainly include forward foreign currency contracts that are used to manage exposure to risk of changes in foreign currency exchange rates of receivables and payables. Please see Note 13 for more details about derivatives.

(3) Risk Management for Financial Instruments

Credit risk management

Credit risk is the risk of economic loss arising from a counterparty's failure to repay or service debt according to the contractual terms. The Group manages its credit risk from receivables on the basis of internal guidelines, which include monitoring of payment terms and balances of major customers by each business administration department to identify the default risk of customers at an early stage. With respect to debt securities, the Group manages its exposure to credit risk by limiting its funding to high-credit rating bonds in accordance with in its internal guidelines. Please see Note 13 for information about derivatives.

The maximum credit risk exposure of financial assets is limited to their carrying amounts as of March 31, 2013.

Market risk management (foreign exchange risk and interest rate risk)

Foreign currency trade receivables and payables are exposed to fluctuations in foreign currency exchange rates. Such foreign exchange risk is hedged occasionally by forward foreign currency contracts.

Marketable and investment securities are managed by monitoring the market values and financial position of issuers on a regular basis.

The basic principles of derivative transactions have been approved by the chief financial officer based on internal guidelines that prescribe the authority and the limit for each transaction by the corporate treasury department. Reconciliation of the transaction and balances with customers is made and the transaction data is reported to the chief financial officer on a monthly basis.

Liquidity risk management

Liquidity risk comprises the risk that the Group cannot meet its contractual obligations in full on maturity dates. The Group manages its liquidity risk by holding adequate volumes of liquid assets along with adequate financial planning by the corporate treasury department.

(4) Concentration of Credit Risk

As of March 31, 2013, 16.6% of total receivables are from specific major customers of the Group.

(5) Fair Values of Financial Instruments

Fair values of financial instruments are based on quoted prices in active markets. If quoted prices are not available, other rational valuation techniques are used instead.

(a) Fair value of financial instruments

		Millions of Yer	
	Carrying		Unrealized
March 31, 2013	Amount	<u>Fair Value</u>	Gain/Loss

Derivatives	\$ (43)	\$ (43)			

Cash and Cash Equivalents

The carrying values of cash and cash equivalents approximate fair value because of their short maturities.

Notes and Accounts Receivables

The carrying values of notes and accounts receivables approximate fair value because of their short-term settlement.

Short-Term Investments and Investment Securities

The fair values of short-term investments and investment securities are measured at the quoted market price of the stock exchange for equity instruments and at the quoted price obtained from financial institution for certain debt instruments. Information on the fair value for the short-term investments and investment securities by classification is included in Note 4.

Accounts Payable

The carrying values of accounts payable approximate fair value because of their short-term settlement.

Derivatives

The information of the fair value for derivatives is included in Note 13.

13. DERIVATIVES

The Group enters into derivative contracts, including foreign currency forward contracts, to hedge foreign exchange risk associated with certain assets and liabilities denominated in foreign currencies.

All derivative transactions are entered into to hedge foreign currency exposures incorporated within the Group's business. Accordingly, market risk in these derivatives is basically offset by opposite movements in the value of hedged assets or liabilities.

Because the counterparties to these derivatives are limited to major international financial institutions, the Group does not anticipate any losses arising from credit risk.

Derivative transactions entered into by the Group have been made in accordance with internal policies that regulate the authorization and credit limit amount.

Derivative Transactions to Which Hedge Accounting Is Not Applied

Derivative transactions to which hedge accounting is not applied at March 31, 2013, are as follows:

		Million	s of Yen	
		Contract Amount		
	Contract	Due after	Fair	Unrealized
March 31, 2013	Amount	1 Year	<u>Value</u>	Gain/Loss
Foreign currency forward contracts— Selling Euro	¥1,345		¥(17)	¥(17)

	Millions of Yen	Thousands of U.S. Dollars
Year-end cash dividends, ¥25 (\$0.3) per share	¥533	\$5,670

16. SEGMENT INFORMATION

Under ASBJ Statement No. 17, "Accounting Standard for Segment Information Disclosures," and ASBJ Guidance No. 20, "Guidance on Accounting Standard for Segment Information Disclosures," an entity is required to report financial and descriptive information about its reportable segments. Reportable segments are operating segments or aggregations of operating segments that meet specified criteria. Operating segments are components of an entity about which separate financial information is available, and such information is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. Generally, segment information is required to be reported on the same basis as is used internally for evaluating operating segment performance and deciding how to allocate resources to operating segments.

(1) Description of Reportable Segments

The Group is primarily engaged in the manufacture, development, and sale of visual display systems and related products. The Group consists of the single industry, and therefore, it is not required to disclose separate financial information by segment.

(2) Information about Products and Services

	Millions of Yen				
		2013			
	Monitor for	Amusement			
	Computer Use	Monitor	<u>Other</u>	<u>Total</u>	
Sales to external customers	¥30,690	¥18,074	¥9,506	¥58,270
