EIZO Announces the 9th Mid-Term Business Direction

"Beyond Display. Behind Every Decision."

Hakusan, Japan, October 30, 2026 - EIZO Corporation (TSE: 6737) announced the completion and official release of EIZO's 9th Mid-Term Business Plan, covering FY2027 through FY2029 as follows:

1. Mid-Term Business Direction

Since its founding in 1968, EIZO has consistently placed "visual technology" at the core of its business and developed a distinctive business model that integrates development, manufacturing, sales, and support. Going forward, we will continue to contribute to a prosperous future society by supporting public safety, healthcare, and critical infrastructure through Visual Technologies that enable users to make and critical decisions with confidence.

To realize this vision, the 9th Mid-Term Business Direction designates the next three years as a period for 'Company Transformation' and 'Profit Structure Reform', during which, we will drive profit and sustainable business growth. We will strengthen our business portfolio based on growth and profitability, prioritize the allocation of management resources to growth areas, and expand business through EVS (EIZO Visual Systems), leveraging our monitor heritage to deliver integrated imaging solution that combine hardware , software, and services. Prior to the commencement in April 2027, we will progressively implement the necessary initiatives and measures during FY2026 to ensure its effective execution.

2. Financial Targets

In FY2029, the final year of the plan, we target consolidated Net Sales of JPY 94.0 billion, Operating Profit of JPY 8.0 billion, and an Operating Profit margin of 8.5%.

3. Business Portfolio

Based on market growth potential, our competitive advantages, and profitability, we will classify each market segment into three categories: "Growth Businesses," "Core Businesses," and "Businesses for Transformation." We will prioritize growth investment and tailor operations and policies in accordance with each respective category.

- Growth Businesses

  These markets offer high market growth potential and are expected to deliver strong profit growth by leveraging our high-quality, highly reliable Visual Technologies, proven track record in mission-critical markets, and global customer base. We will focus on Surgery & Treatment, Security & Surveillance, and Defense markets, concentrating growth investments to accelerate business expansion and profitability.
- Core Businesses

  These markets are supported by established customer relationships, specialized expertise, and strong competitive positions, providing a stable foundation for sustainable earnings. Focusing on Diagnostics & Examination, Air Traffic Control, Maritime, and Amusement, we will strengthen our market position while enhancing profitability through reinforced sales and service capabilities and other targeted initiatives.
- Businesses for Transformation

  Business & Plus (B&P) and Creative Work serve as the foundational businesses of our technology, brand, procurement, and manufacturing capabilities. As these businesses face market maturation and evolving competitive dynamics, we will optimize their business frameworks while preserving their strategic role, transitioning to a structure that emphasizes profitability and sustained value creation.

4. Growth Strategy

To drive future growth, we will accelerate earnings capacity, mid- to long-term growth, and new business development. We will also leverage M&A to enhance EVS Imaging Solutions, strengthen our engineering capabilities, and expand our business foundations in the Healthcare and V&S markets.

5. Financial Strategy

While maintaining financial soundness, we will balance growth investments and shareholder returns to achieve sustainable long-term growth. In addition to increasing Earnings Per Shares (EPS), we will seek to improve ROE by enhancing asset efficiency and optimizing our capital structure through the reduction of Cross-Shareholdings, the use of shares held for pure investment purposes to fund growth investments, and Share Buybacks.

We aim to achieve ROE of 8.0% in FY2029 and will work to enhance corporate value through sustainable profit growth and improved capital efficiency.

6. Shareholder Return Policy

We regard the continued pursuit of proactive research and development to support growth, together with shareholder returns, as a key management priority. In doing so, we aim to achieve sustainable growth through business expansion and improved performance while maintaining financial soundness.

During the 9th Mid-Term Business Direction, we will maintain an annual dividend at JPY115 per share and provide sustainable dividends by ensuring that the total dividend payments remains within core net profit, excluding gains on the sale of Investment Securities. We will also implement shareholder returns flexibly, taking comprehensive account of our performance, share price levels, stock market conditions, and other relevant factors. In addition to the Share Buyback program announced on July 31, 2026, we plan to conduct further Share Buybacks of up to approximately JPY 27.0 billion during the 9th Mid-Term Business Direction. Our target total shareholder return ratio will be 70% or more of consolidated net profit.

Note: The information contained in this plan is based on various assumptions and does not constitute a commitment or guarantee that the stated future numerical targets or measures will be achieved.

Please refer to the attached materials for further details of the mid-term business direction.

About EIZO

EIZO (TSE:6737), which means image in Japanese, is a visual technology company that develops and manufactures high-end visual solutions to enrich people in their professional and personal lives. EIZO offers total imaging solutions with a range of monitors, software, video capture, processing, and distribution solutions, cameras, and advanced integrated technologies, to meet the specialized needs of customers in business, creative fields, healthcare, air traffic control, maritime, security & surveillance, and more. Headquartered in Hakusan, Japan, EIZO has R&D and manufacturing facilities in Japan, China, Germany, and the United States, and representation in more than 130 countries.

Business Strategy: Healthcare

From Diagnosis to Treatment

Providing Integrated Support for Image Quality & Clinical Workflows

Business Environment

Diagnostics & Examinations
(Core Businesses)

- Diagnostic monitor markets in developed countries are mature.
- Clinics want to cut workload and manage multiple devices from one place for better efficiency
- AI-assisted and remote diagnostics are increasingly widespread

Surgery & Treatment
(Growth Businesses)

- Growing adoption of endoscopic & robotic surgery
- Doctor shortages are pushing hospitals toward digital tools and new work styles
- Transitioning selection criteria from a product-focused to a system-wide approach in OR video system setups

EIZO's Strengths

- Quality & reliability of diagnostic monitors
- In-house software and cloud tools aligned with the latest international standards for monitor quality control
- A global customer base and both local and global sales & support infrastructure

- High image quality, highly regarded in the market, as exemplified by the 3D surgical monitors
- A comprehensive portfolio of OR imaging equipment extending beyond monitors
- Identification of customer needs & product development leveraging EIZO's high share of Japan's systems business

Key Actions

- Advancement of Quality Control solutions using AI technologies
- Expansion of software & services business
- Acceleration of the digital pathology business
- Strengthening of the sales structure, particularly in North America

- Broaden the surgical monitor lineup
- Enhance overall value through integration with our OR imaging equipment
- Develop AI tools that put recorded surgery footage to work
- Boost sales in North America, China, & India
- Deepen ties with medical device manufacturers & OR integrators

Business Strategy: V&S

Advancing EVS Imaging Solutions

Creating Greater Value for Public Safety and Critical Infrastructure Through High-Reliability Visual Technologies

Business Environment

Growing Demand for Advanced and Intelligent Imaging

- Growing demand for remote operations, automation, & AI usage amid labor shortages
- Continued infrastructure renewal and active investment in emerging markets
- Growing defense investment driven by heightened security needs

EIZO's Strengths

Unrivaled Reliability & Trusted Expertise in Mission-Critical Applications

- Highly reliable hardware spanning monitors, cameras, & decoders, combined with software and system engineering capabilities
- Leading positions in multiple markets with a trusted global customer base
- Proven reliability in demanding 24/7 environments

Key Actions

Strategic Investments & Accelerating Global Expansion

- Strategic investment focused on R&D, technical sales & global reach driving profitable growth
- Leverage our leading market positions to evolve toward advanced visual solutions with greater customer value

Business Strategy: B&P / Creative Work

Rebuild the Business Foundation

Enhance Brand Strength, Competitiveness, & Profitability

Business Environment

B&P | Transformation

- Market growth remains flat, with continued price competition
- Opportunities exist in optimizing TCO*, including long-term use & energy efficiency

Creative Work | Transformation

- Market growth remains flat, with the entry-level segment facing continued price competition
- Consistent color management is becoming increasingly important as video production environments grow more sophisticated & decentralized

EIZO's Strengths

- High quality & reliability
- Long-term warranties & product availability
- TCO optimization proposals including maintenance & upgrades
- A sustainability-driven management foundation

- Customer base in corporate & professional markets
- Cross-selling across other markets & expertise in tailored solutions

- Color reproduction & image stability technologies
- Color management solutions
- Strong recognition of ColorEdge

Key Actions

Focus on High-Value-Added Products

- Strengthen TCO & Sustainability Value

- Optimize product lineup
- Redefine target market & customer segments to strengthen product & sales competitiveness

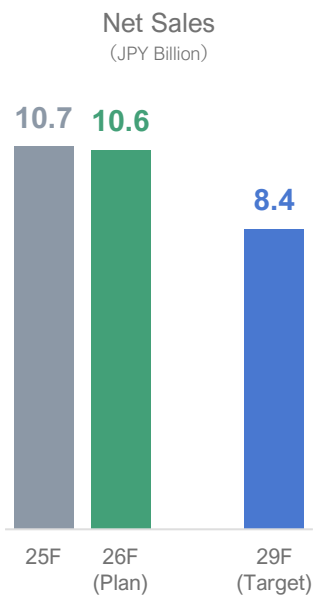

- Pursue advanced visual imaging technologies using state-of-the-art devices

*TCO: Total Cost of Ownership

Business Strategy: Amusement

Leverage Integrated Hardware & Software Capabilities to Maintain Stable Earnings

Situational Awareness

- The market continues to contract gradually
- The shift to smart pachinko and pachislot machines is gaining momentum
- Smart pachislot machines are driving the market

EIZO's Strengths

- Strong, long-standing partnerships with leading companies
- Over 30 years of integrated hardware & software development
- Strong supply capabilities through the close integration of component procurement, manufacturing, & quality assurance

Key Actions

- Strengthen the earnings structure through proposal capabilities, speed, & quality
- Propose new value through comprehensive hardware & software development capabilities
- Shift from unit-volume dependence to value creation

Improving Return on Capital

Drive Earnings Growth & Capital Strategy to Achieve 8.0% ROE in 29F

Improving Asset Efficiency

- Accelerate the reduction of Cross-Shareholdings
- Utilize shares held for pure investment purposes for growth investments
- Strengthen the internal framework to identify and execute M&A opportunities

Capital Optimization

- Achieve an appropriate level of capital over the medium to long term
- Flexibly execute Share Buybacks of up to JPY 27.0 Billion

Shareholder Returns

- Maintain annual dividends at JPY 115 per share for three years, while controlling the total dividend amount
- Keep total dividends within core net profit to ensure sustainable dividend payments
- Target a total payout ratio of 70% or more

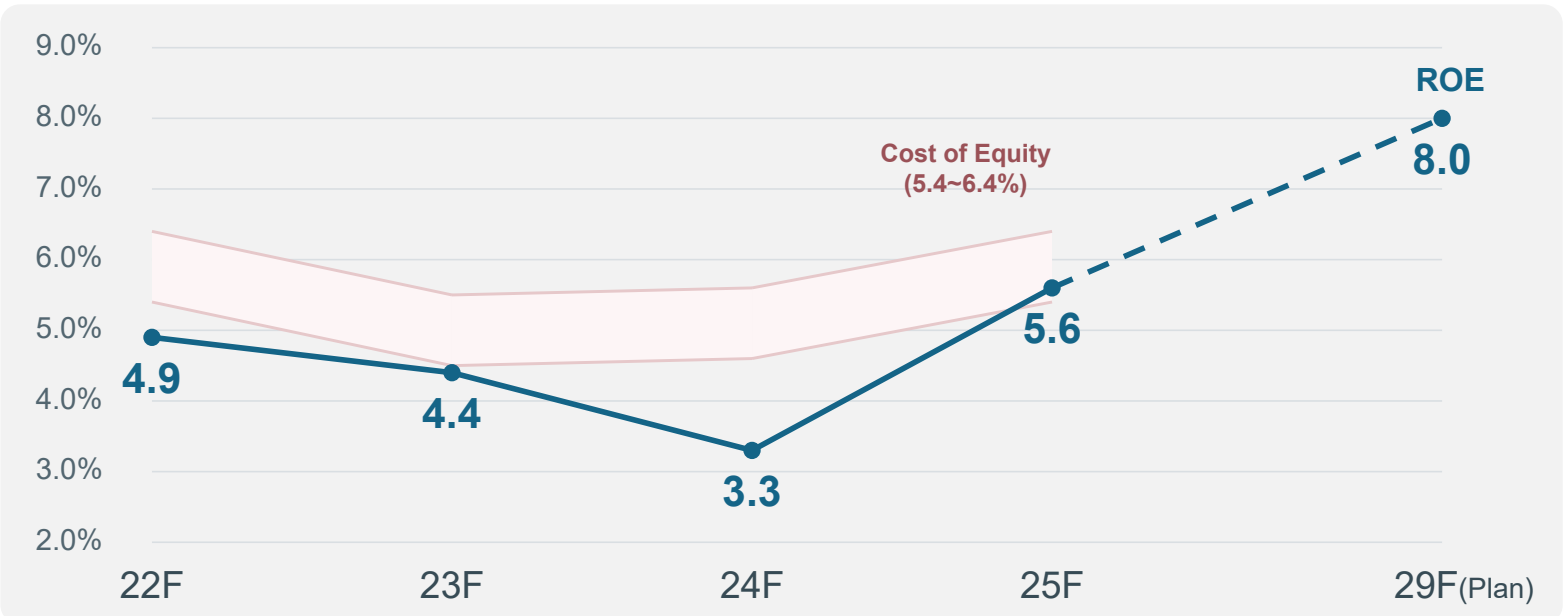

Management Focused on Capital Efficiency & Share Price

- Adopt ROE as a performance indicator for performance-based remuneration for Directors
- Introduce restricted stock incentive plan for employees

Cash Allocation

8th Mid-Term Business Plan (24F ~ 26F)

- Investment to Strengthen the Business Model: JPY 7.5 Billion
- Funding Sources: Operating Cash Flow and Proceeds from the Sale of Investment Securities
- Proactive Shareholder Returns
- Promote Inventory Optimization

Note: Includes 26F Plan

9th Mid-Term Business Direction (27F ~ 29F)

- Maintain Financial Soundness as the Foundation of the Business
- Further Accelerate Growth Investments
- Secure Funds through the Sale of Investment Securities
- Maintain Shareholder Returns

© 2026 EIZO Corporation. All Rights Reserved.

Shareholder Returns

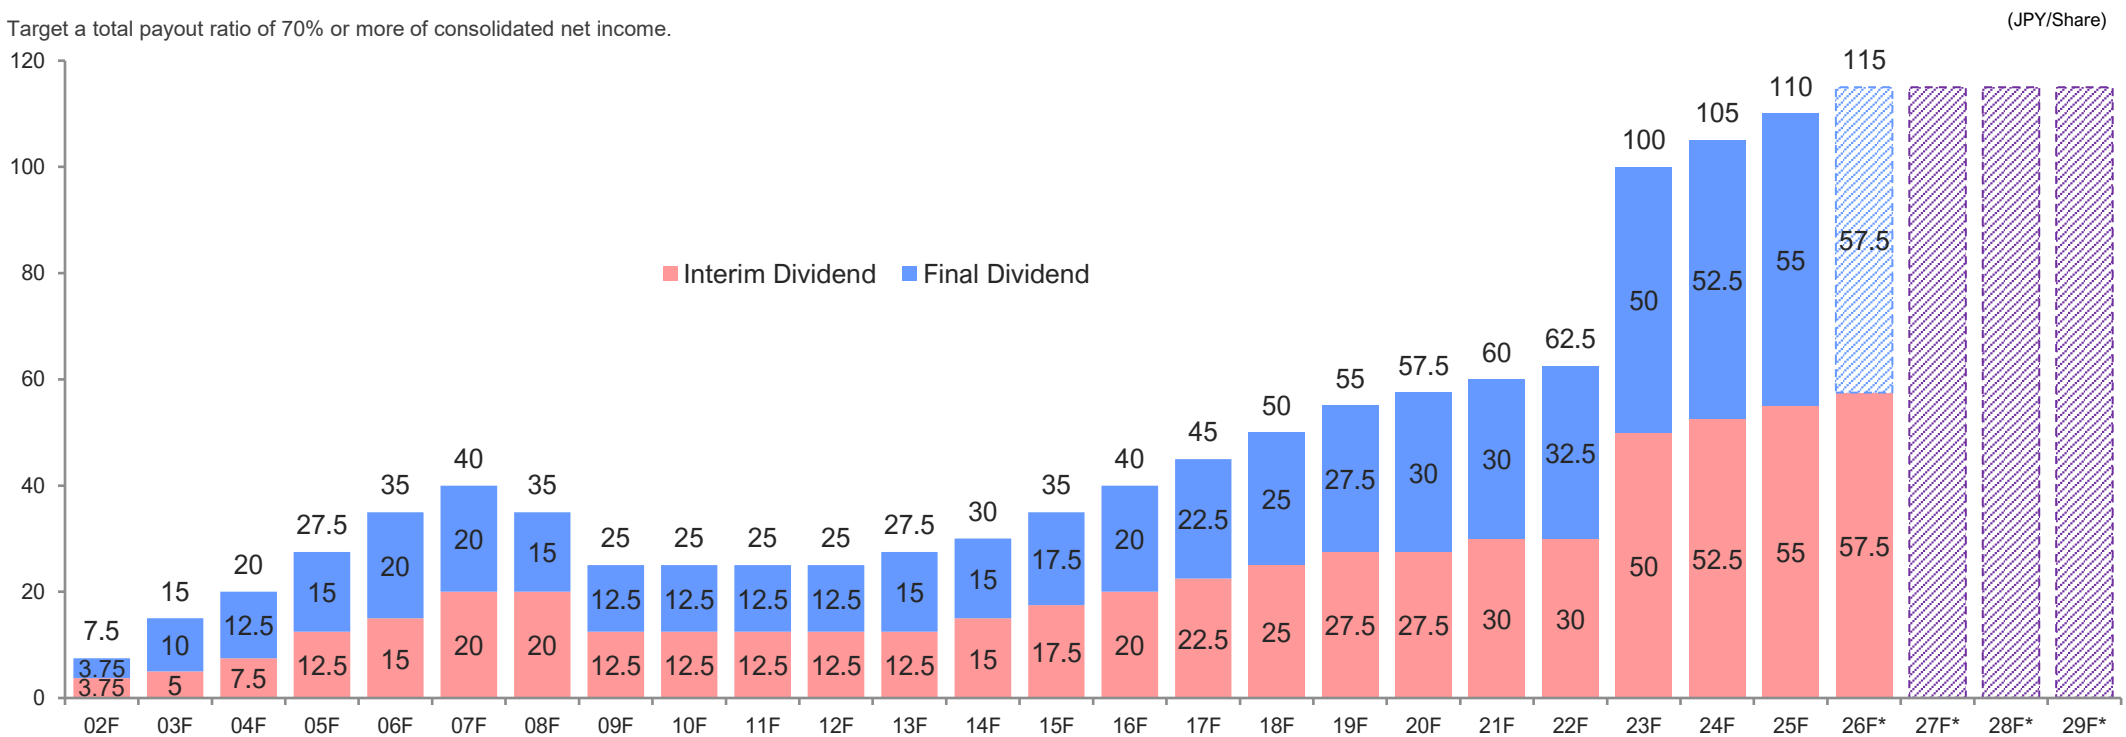

Shareholder Return Policy

EIZO will continue to invest proactively in R&D to drive growth, while striving for sustainable expansion, enhanced business performance, and the preservation of financial soundness. Additionally, EIZO considers shareholder returns a key management priority.

EIZO designates the three years of the 9th Mid-Term Business Direction, as a period for 'Company Transformation' and 'Profit Structure Reform', thereby driving profit and sustainable business growth.

EIZO will maintain annual dividends at JPY 115 per share and use Share Buybacks to manage the total dividend amount, ensuring it remains within the core net profit (net income excluding gains from the sale of investment securities).

Target a total payout ratio of 70% or more of consolidated net income.
