

## EIZO Introduces FlexScan L362T 15-inch Touch Panel LCD Monitor

Matto, Japan, May 28, 2003 – Eizo Nanao Corporation today announced the release of the FlexScan L362T, a 15-inch (38 cm) touch panel LCD monitor featuring analog capacitive technology. Accepting finger touch input, the FlexScan L362T offers high image quality and a long touch life needed for kiosks, factories, point-of-sales, and reception areas. It is also TÜV/GM<sup>1</sup> certified for use in medical environments including operating rooms.

The FlexScan L362T incorporates an IPS (In-Plane Switching) LCD panel with wide horizontal and vertical viewing angles of 170°, native resolution of 1024 × 768, 180 cd/m<sup>2</sup> brightness, and 400:1 contrast ratio. The IPS panel minimizes the color shift, ensuring that two or more people can comfortably view the screen at once.

The touch panel is built into the monitor and utilizes analog capacitive technology with a long touch life of over 225 million touches and optical clarity of 84%. The panel includes a durable antibacterial protectant, making it highly resistant to water, grease, dirt, and static.

The FlexScan L362T is designed to fit into compact spaces with its thin bezels, internal power supply unit, and removable stand for mounting. Dual 1-watt speakers are built into the monitor for audio confirmation of touch input.

DVI-D and D-sub mini 15 pin inputs allow for simultaneous connection to computers outfitted with digital and analog graphics boards. A button on the front panel lets the user quickly toggle between input signals when two computers are connected to the monitor at the same time.

The FlexScan L362T carries the in-house “EIZO Eco Products 2002” label, signifying that it conforms to a range of eco-friendly criteria in respect of design, manufacture, packaging, and usage, including the introduction of lead-free solder and chrome-free steel plates.

### Availability

The FlexScan L362T will go on sale in June worldwide through EIZO’s network of international distributors. The cabinet comes in a choice of gray or black.

### About EIZO

Eizo Nanao Corporation is a leading global manufacturer of high-end visual display products with a wide range of LCD, CRT, and PDP monitors, and Windows-Based Terminals.
