

## EIZO Achieves ISO 13485 Certification

Hakusan, Japan, April 6<sup>th</sup>, 2005–Eizo Nanao Corporation (“EIZO”) today announced that it has received ISO 13485 certification for the quality management system for its medical display devices. EIZO is the first stand-alone monitor manufacturer in the world to receive this certification.

The ISO 13485 was developed in 1996 and then revised in 2003 as an internationally recognized standard to improve the quality management systems applicable to manufacturers of medical devices and organizations providing services related to these devices. Approval to this standard demonstrates a company’s ability to consistently meet customer requirements for these devices and services

To earn ISO 13485 certification, a company must implement and document strict quality management processes for product development, marketing, delivery, employee training and material purchasing, among others. Achieving this certification, further reinforces EIZO’s efforts to manufacture high-quality medical display devices for the medical community.

Information on all EIZO’s medical display devices can be found at EIZO’s medical imaging website: [www.radiforce.com](http://www.radiforce.com)

### About EIZO

Eizo Nanao Corporation is a leading global manufacturer of high-end visual display products with a wide range of LCD monitors and Windows-Based Terminals. The image quality, long-term reliability, and innovative features of EIZO monitors make them the product of choice in many financial trading rooms, hospitals, back offices, and design studios throughout the world. EIZO is based in Japan and represented in over thirty countries by a network of exclusive distributors.
