- Compatibility is determined based on verification results of cameras with the same platform.
- If you want to use other functions such as PTZ and presets in addition to video display, please consider verifying compatibility with the actual products in advance.

All models

- Setting the GOP structure of the Encoder Profile to "IP" via the camera's setup window is required.
- If characters other than alphanumeric characters are included in the camera's Encoder Profile name, garbled characters will be displayed in the Encoder list of the Video Settings window of the IP decoding monitor.
- Ver.2.0000-2.0000 : When JPEG stream is used, setting the resolution of the JPEG stream to "288p" is required, and then set Media Profile of IP decoding monitor to "JPEG_xxxx".

*3-1

- Updating the camera's firmware version to 6.11.0006 or later is required.
- Setting the "Application variant" of the "Installer Menu" to "DEWARP" mode is required.

*4-1

- The camera's brightness and focus operations are not supported.
