

This page contains the compatibility information of the FlexScan monitors with USB Type-C capable PCs.

Click to see daisy chain compatibility information for these monitors.

- [▶ EV2795](#)
- [▶ EV2495 / EV2490](#)

**[ Validated Items ]**

- Displays BIOS image correctly
- Displays the image correctly with the recommended resolution and refresh rate
- Plug & Play works correctly
- Colors display correctly
- No noise and blinking of image
- "Standby", "Sleep", "Restart" and "Shut down" functions work correctly
- USB Type-C function works correctly

**[ Validated Cables and Peripherals ]**

USB Type-C cable: CC200SS-5A / CC150SS81G-5A (supplied with monitor), CC100 (sold separately)

Caution: This information is provided based on our in-house testing and we do not guarantee the compatibility in respective user environments.

- \*1 Image may not display correctly after reconnecting the image cable.
- \*2 The laptop screen may occasionally flicker or show a black screen.
- \*3 Image may not display when booting with the cable connected to the monitors. Reconnecting the cables may be required.
- \*4 Image does not display when booting in power save mode.
- \*5 Having the LAN adapter connected while in Sleep Mode may cause network slowdowns due to a bug with the OS built-in network driver. (More info)
- \*6 The connection with USB hub may be unstable when using the Thunderbolt 3 port. It is recommended to use the USB Type-C port used to connect the AC adapter located at the far left of the laptop.
- \*7 We don't recommend daisy chaining the monitor via Dock 2 as operation may become unstable.
- \*8 Image does not display when turning off/on the power or swapping USB Type-C cable.
- \*9 Evaluated OS: macOS Catalina (10.15.5)
- \*10 "Slow charger" message on Windows can appear.
- \*11 Set "USB-C Display Mode" to "Extra". When this function is set to "Extra", the USB transfer speed is limited to a maximum of 480 Mbps (high speed).
