

**Apple M1/M2 series Chip Equipped Mac Computer and EIZO Monitor Compatibility**

**1. Outline**

We have tested the display compatibility between Apple M1/M2 series Chip Equipped Mac Computer and EIZO monitors.

Note: This information is provided based on our in-house testing and we do not guarantee the compatibility in respective user environments

**2. Applicable Monitors**

ColorEdge series and FlexScan series

**3. Validation Result**

<sup>1</sup> Power supply is limited up to 15W because of the monitor specification.

<sup>2</sup> (2) Color Format and (3) Color Profile issues still remains.

<sup>3</sup> Mac mini does not support USB Type-C Power Delivery from the monitor.

<sup>4</sup> Monitor may not awake from Display Sleep by operating the keyboard once connected to the USB hub of the monitor.

<sup>5</sup> When connecting Mac via HDMI cable, the monitor may show incorrect color and uneven tone. Please refer to the link for details.

<sup>6</sup> The flicker may occur in some cases when connecting CS2400S to Apple M1/M2 series Chip Equipped Mac Computer. Please refer to the link for details.
