This Quick Reference describes the basic monitor adjustment. For advanced settings and adjustments, refer to the ColorNavigator User's Manual (CD-ROM).
The available functions and displayed windows depend on the type of measurement device or monitor.

### Procedure from Monitor and Measurement Device Connection to ColorNavigator Startup

#### Connecting Monitor and Measurement Device

1. Connect the USB upstream port of monitor and the USB downstream port of computer with the EIZO USB Cable (MD-C93 or UU2005S).

2. Connect the measurement device to the USB downstream port of the computer or the monitor.

* Some measurement devices may have restrictions on the USB port to connect. For details, see the user's manual of the measurement device.

#### Preparing

- Before performing monitor adjustment, turn on both the monitor and the computer (warming up).
  * For details on the warming-up time, see the User’s Manual of the monitor.
- Disable the power management function of the computer so it does not enter power saving mode.
- Set the display resolution and colors.
  - We suggest using the monitor with the recommended resolution.
  - Set the monitor color at 16.7 million (24 bit) or more.
  * About the recommended resolution of the monitor, see the user’s manual of the monitor.

#### Starting Up on Macintosh

Double-click the “ColorNavigator 6” icon in the “Applications” folder.

#### Starting Up on Windows

Double-click the “ColorNavigator 6” shortcut icon on the desktop.

### Operation on Main Window

#### About Buttons

- **Adjust...** Adjust the monitor based on the adjustment target that is selected from the target list.
- **Validate...** Validate the monitor adjustment status with respect to the adjustment target of the monitor.
- **Advanced +** Provide functions, such as manual adjustment and profile emulation.
- **Preferences...** Make the ColorNavigator operation settings.
- **Create a new target...** Specify the target and set a new adjustment target.
- **Detail...** Display the details of the adjustment target selected from the target list.

The below window appears after starting up ColorNavigator.
**Adjustment Procedure**

1. **Selecting Targets**
   Select an adjustment target from the target list in the main window and click “Adjust”.
   - **Printing**
     Standard setting for printing
   - **Photography**
     Standard setting for viewing photographs
   - **Web design**
     Standard setting for creating Web contents

2. **Selecting a Measurement Device**
   Follow the software instructions and select a measurement device. Initialize the measurement device if necessary.

3. **Attaching Measurement Device**
   Tilt the LCD panel up slightly and attach the measurement device to the measurement window. (Refer to the user’s manual of the measurement device.)

4. **Starting the Monitor Adjustment**
   Click “Proceed” to adjust the monitor. ColorNavigator sequentially shows some patterns for adjusting the monitor. Progress bars are displayed on the right-bottom corner while adjustment is in progress.

5. **Confirming the Adjustment Result**
   After completing the monitor adjustment, confirm the adjustment result displayed.

   - Save the adjustment result and generate a monitor profile.

   The monitor adjustment is completed.
